PAY FOR FUEL WITHOUT WAITING WITH PAY@PUMP IN THE LUKOIL APPLICATION

With PAY@PUMP, users can complete the payment directly via their mobile phone, without additional delay after refueling.
The procedure is simple: after refueling, it is necessary to open the LUKOIL application, scan the QR code placed on the pump and make the payment directly via the application.
In this way, the service allows for a faster completion of the visit to the gas station and greater convenience for users, especially during longer trips and in periods with greater frequency.
Additionally, the promotional material also lists the possibility of a direct discount of 0.5 denars per liter of fuel.
PAY@PUMP – refuel, scan and pay via the LUKOIL application, without unnecessary waiting.
